*Regulations affecting Students in the Faculty of
Practical Science.*

1. No person will be considered to be a student in Practical Science until after he has registered in that Faculty.

2. No person who is not registered in the Faculty of Practical Science will be allowed to attend any of the special classes of that Faculty.

3. Practical work in the mechanical laboratories is of special importance and must be carried out in strict compliance with the requirements.

THE SCHOOL OF MINING.

THE SCHOOL OF MINING, affiliated with the University, is a branch of the *School of Mining and Agriculture*, incorporated by Act of the Legislature of Ontario.

OBJECTS.—The objects of the School of Mining are to give a scientific education, both theoretical and practical, to men studying for the profession of the mining engineer, the assayer, the consulting geologist, and the metallurgist; and to provide for prospectors, mine foremen and others interested in the discovery and winning of minerals such instruction as will make their occupation more interesting and less liable to failure.

SITUATION.—The School has been placed near Queen's University so as to take advantage of the instruction therein provided in English, mathematics, physics, and biological sciences. It has been thus possible to equip and carry on a good technical school on a much smaller revenue than would otherwise be called for to maintain a high standard of scholarship.

MATRICULATION.—Before being admitted to examination on the work of the course, candidates for a degree must pass the matriculation examination, or otherwise satisfy the Faculty of their fitness to proceed with their course. Matriculation consists of the Junior Leaving examination for Ontario in the subjects of English and Mathematics.

The B.Sc. course in Chemistry and Mineralogy, or in Geology and Mineralogy, can be completed in one year after graduation in an honour course in Chemistry, Mineralogy and Geology, in the Faculty of Arts.

EQUIPMENT.—The classes of the School of Mining are held in the John Carruthers Science Hall, which is well equipped with chemical, assay, mineralogical and petrographical laboratories and museums. The mining laboratory in an adjoining building is furnished with machinery to illustrate the processes of crushing, stamping, amalgamating, concentrating, cyaniding, chlorinating, &c. This was the first mining laboratory built in Canada, and several important investigations on Ontario ores have already been conducted in it.

For Calendar and further information apply to the Bursar, School of Mining, Kingston.

ENDOWMENT OF CHAIRS AND TUTORSHIPS.

In 1888, William Nickle, Esq., Kingston, gave the sum of \$2,500 to found "The William Nickle Tutorship in Mathematics."

In 1892, Hugh Waddell, Esq., South Monaghan, gave the sum of \$2,500 to found, in memory of his father, "The Robert Waddell Tutorship" in Physics or Natural Science.

In 1893, John Roberts, Esq., Ottawa, bequeathed the sum of \$40,000 to the University. In recognition of his generosity, the Trustees resolved that the Chair of Animal Biology should bear his name, and that the Chair of Botany should bear the name of John Roberts Allan, his executor.

In 1892, the Hon. Senator Gowan gave a contribution to be the nucleus of an endowment for a Chair of Political and Economic Science to bear the name of the late Right Hon. Sir. John A. Macdonald, and added to it from time to time till in 1898 it amounted to upwards of \$5,000.00. The Trustees then issued an appeal for the object to the friends of the great statesman, and this resulted in increasing the sum available to nearly \$22,000. It was then decided to found the Chair and Professor Adam Shortt was made the first occupant and at the same time he was relieved of the charge of the library and Miss

Lois Saunders was appointed librarian at a salary of \$400. On April 30th, 1899, the Sir John Chair was formally established, Sir Charles Tupper, Bart., M.P., pronouncing the oration in honour of his old leader, in the City Hall on that day.

The late Dr. Williamson prepared for "Doomsday Book," a history of the first fifty years of the University. He has given an account of the Funds raised at different times for general or special purposes during this period, with the names of subscribers, down to the Jubilee fund of 1887-90. When the history is completed, an abridgement with a sketch of the different Funds and the principal contributors will be published in the Calendar.
